

mango Fax

Fax. Made Simple.

Why Business Fax Machines Are Out

Fax machines are considered old technology and are often heavily lacking in security. Both incoming and outgoing faxes do not come with a guarantee of confidential transmission, which poses potential risks to every organization that uses them. Traditional fax machines are NOT a naturally secure way to exchange sensitive information.

The Best Cloud-Based Business Fax Solution

Mango Voice Secure Business Fax adds all the security in all the right places. We have re-invented the process of secure fax, making it easier for you to share time-sensitive information without worrying about security issues.

How?

Through Mango's business fax feature, you can fax from your mobile device by simply adding an attachment or taking a picture. We encrypt the transmission and store your data in our super-secure cloud-based server. Unique features such as password-protected logins to access fax, the ability to adjust the number of times fax can be downloaded or accessed, and more.
